

Origami Puppy

	<p>You will need a piece of paper and some scissors</p>
	<p>Cut out a square of paper, if you need help - ask an adult!</p>
	<p>Turn the square piece of paper so that it looks like a diamond</p>

Fold the top corner of the square down to the bottom of the square to make a triangle.

Fold this triangle in half to make another triangle.

Open it up again so that you have a triangle like this.

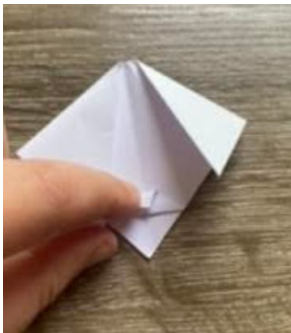

Next, you need to do the ears!
Fold down each corner of the triangle.
Don't forget to do both sides!

Nex is the nose. Fold the bottom corner up (only the first layer of paper)

It should look a bit like this!

Now fold the tip of that triangle down. This can be a little tricky but is good to help build your fine motor skills!

This is what it should look like now

Next, give your puppy some eyes, colour in its nose and maybe even give it a smile!

Most importantly, don't forget to give your origami puppy a name!
